Aura Air unveils smart air-purifiers in India

20 April 2022 | News

Aura Air air-purifiers have been clinically certified for their effectiveness against the SARS-CoV-2 virus

Aura Air, a publicly listed company with the Tel-Aviv Stock Exchange (TASE), has launched its smart air management platform in India. Aura Air air-purifiers detect, capture, and kill viruses, bacteria, mold and can remove airborne particles as

small as 0.3 microns, including allergens and viruses. These IoT-enabled devices connect to a mobile phone and deliver real-time updates on the overall indoor and outdoor Air Quality Index (AQI) based on VOC (Volatile Organic Compounds), CO2 (Carbon Dioxide), CO (Carbon Monoxide), and fine particulate matter levels.

Aura Air purifiers have successfully cleared clinical trials confirming their effectiveness against the corona virus in a study conducted at Sheba Medical Center and the results have been published in the world*Journal of Surgery and Surgical Research*. Aura Air is also in the process of getting Food and Drug Administration, USA approval.
