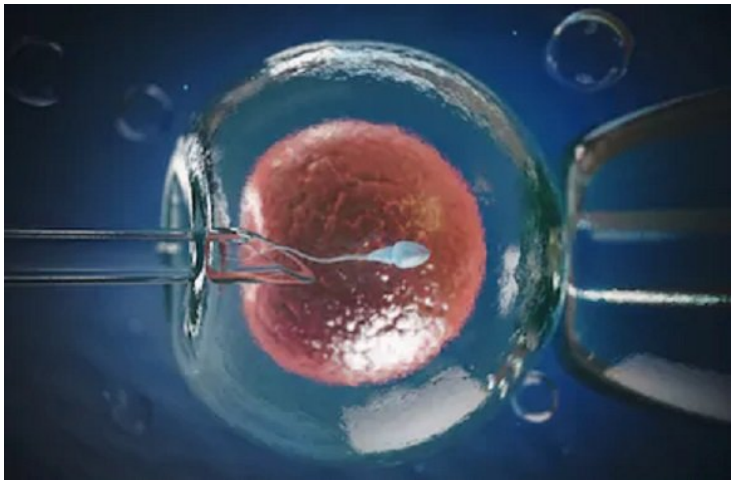
Indira IVF adds 4 new centres in tier-III cities

28 September 2020 | News

Indira IVF chain now runs 92 centres across the country



Mumbai based Indira IVF, the largest player in the infertility treatment space in India, in its efforts to provide affordable and best in class treatment to couples seeking infertility treatment has recently added four new centres in Tier-III cities namely, Nanded, Warangal, Sirsa and Gulbarga in the first half of FY20-21. The infertility specialist clinics chain now runs 92 centres across the country helping desirous couples fulfil their dream of parenthood.

Indira IVF's intent for their patients' wellbeing goes beyond their reproductive health, and hence, abiding by the guidelines laid by the government, the organization had shut down all their treatment centres for over two months. On June 3, 2020, Indira IVF once again opened its doors to aspiring couples and is optimistic that the pre-COVID volume of IVF procedures will restore by December this year.

Currently, all Indira IVF centres strictly adhere to government protocols of running the centres and ensures that the utmost safety standards are maintained for their staff and patients visiting the clinic.

Indira IVF today is the largest and most recognized fertility chain of hospitals in the country. Armed with state-of-the-art infrastructure, Indira IVF helps countless couples navigate the often-complicated journey of infertility and ultimately realize their dream of starting a family.
