Synapsica partners with GenWorks Health to promote radiology workflow solutions

01 December 2021 | News

To create access for Synapsicaâ??s AI-enabled PACS radiology workflow solution â??Radiolensâ?? in 300+ tier 2 and 3 cities across India

Synapsica, a Bengaluru-based AI-based radiology reporting company, has partnered with Wipro GE-backed GenWorks Health, a leading healthcare solutions provider.

The partnership will promote and distribute Synapsica’s AI-enabled PACS (Picture Archiving and Communication System) radiology workflow solution ‘Radiolens’ across the country.

The partnership will enable Synapsica to expand its geographic footprint and create access for Radiolens across 300+ tier II and III towns in states like Maharashtra, J&K, Andhra Pradesh, West Bengal, Chhattisgarh, Chennai, Rajasthan and the North East.

The reports generated with the help of Radiolens enable clinicians to better understand the patient's condition and the extent of the disease and be more objective in their recommendation. Radiolens is already being used across 500+ locations in 15 countries including the US, the UK, Australia and Dubai, and handles 1 million+ case annually.
