VFL Sciences announces cooperation with RocGene Technology

20 January 2025 | News

VFL Sciences to explore further possibilities of collaboration in India

Chennai-based VFL Sciences and RocGene Technology, based in China, have signed an agreement of cooperation wherein VFL Sciences will exclusively sell the entire range of products from RocGene in India.

This multiyear cooperation will enable both companies to explore the Indian market and devise strategies and road map to further strengthen their presence.

Dr Young K. Yun, Vice President, Global RocGene states, “India is one of the largest markets for scientific instruments and we are excited to cooperate with VFL Sciences to grow our business further. We also strongly believe that this cooperation will enable RocGene to become a prominent player in the molecular research and diagnostics market.

Vancheeswaran Sankaranarayanan, Managing Director of VFL Sciences states, “RocGene, founded in 2016, has become one of the leading players in PCR & qPCR market in China and is also present across the globe. The experience from the Chinese and global market will help us in the product positioning in India and will also help us to explore further possibilities of collaboration in India.”
