ICPA launches anti-ulcer dental paste for mouth ulcers

30 August 2022 | News

Triamcinolone acetonide, the main chemical in the paste helps stop or lower the irritation and swelling

ICPA Health Products (ICPA) has introduced its latest offering – Trioplast, an oral anti-ulcer dental paste for treating mouth ulcers. Triamcinolone acetonide, the main chemical in the paste helps stop or lower the irritation and swelling in the mouth by reducing the reaction to the allergen.

ICPA’s Trioplast is indicated for inflammatory disorders of the mouth, desquamative gingivitis; lesions of the oral mucosa, mucositis, oral sub-mucous fibrosis, recurrent aphthous ulcers, stomatitis and ulcerative conditions associated with pemphigus, pemphigoid, etc.

Trioplast 0.1 per cent oral paste is supplied in a 5 g laminated tube containing 1mg of triamcinolone acetonide per gram of paste.
