TimesPro, IIM Nagpur introduce PG certificate programme in blockchain technology

07 November 2022 | News

The programme will teach professionals advanced concepts of blockchain technologies and introduce them to several blockchain platforms

TimesPro and the Indian Institute of Management (IIM) Nagpur have launched the inaugural batch of Post Graduate Certificate Programme in Blockchain Technology to equip learners in developing critical thinking abilities and strong fundaments in blockchain to provide innovative solutions for varied sectors.

The nine-month Post Graduate Certificate Programme in Blockchain Technology will empower learners with a comprehensive understanding of blockchain technology and expose them to platforms like Ethereum and Hyperledger Fabric to write smart contracts and develop blockchain-based solutions.

Blockchain has found global acceptance across leading sectors like financial services, technology, crypto assets, healthcare, governments, supply chains, entrepreneurs and innovators and led to significant benefits across business, including transparency, traceability, reduced costs, etc.

The Post Graduate Certificate Programme in Blockchain Technology will be conducted via TimesPro's state-of-the-art Interactive Learning (IL) platform and delivered in Direct-to-Device (D2D) mode. The programme also includes a three-day campus-immersive session for learners. I

The programme will help learners vastly enhance their skillsets by learning subjects such as Cryptocurrency Mechanics, Blockchain Mechanics, Smart Contracts and Decentralised Applications, Blockchain Applications and Use Cases, Blockchain Architectures and Platforms, Blockchain Programming, among others.
