Vibcare Healthcare opens pharma manufacturing facility with Rs 40 Cr investment in Panchkula

07 December 2023 | News

To provide accessible and premium pharmaceutical solutions globally

Vibcare Healthcare has marked a significant stride in India's pharmaceutical industry with the inauguration of its state-of-the-art manufacturing facility in Panchkula, Haryana. The company's robust investment of Rs 40 crore underscores its dedication to excellence and innovation in pharmaceuticals.

Spanning over 5 acres, the facility adheres to the highest international standards, including EU GMP, PIC/S, and UKMHRA GMP, reinforcing Vibcare Healthcare's commitment to global quality benchmarks and healthcare accessibility worldwide.

The cutting-edge facility comprises four specialised production units for General Tablets, Liquids, Capsules, and Ointments, boasting over 500 approvals and aligning meticulously with global quality standards. This comprehensive infrastructure positions Vibcare Healthcare to comprehensively address diverse healthcare needs with an extensive array of pharmaceutical solutions.

In addition to economic contributions, Vibcare Healthcare's initiative aligns with Prime Minister Narendra Modi's call for job creation and skill development, fostering a skilled workforce. The emphasis on technological advancement mirrors the government's vision of leveraging technology to propel growth, particularly in healthcare.

The quality control lab, equipped with advanced instruments such as UV and Visible Spectrophotometers, HPLC systems, FTIR, Dissolution Testers, Gas Chromatography systems, guarantees rigorous quality control across manufacturing processes.
