

Suven Life Sciences secures 3 product patents

22 March 2018 | News

The drug which have been granted patents are in the treatment of disorders like Alzheimer's disease, Attention Deficient Hyperactivity Disorder (ADHD), Huntington's disease, Narcolepsy, Parkinson and Schizophrenia respectively.

Suven Life Sciences has announced that it has been granted a patent each by Norway, South Korea and Singapore corresponding to new chemical entities (NCEs) for the treatment of disorders associated with neurodegenerative diseases.

The patents are valid till 2027, 2034 and 2036, respectively, the company said in a BSE filing.

"We are pleased by the grant of these patents to Suven for our pipeline of molecules in the CNS arena, which are being developed for cognitive disorders with high unmet medical need with a huge market potential globally," Suven Life CEO Venkat Jasti said.

The granted claims of the patents are being developed as therapeutic agents and are useful in the treatment of cognitive impairment associated with neurodegenerative disorders like Alzheimers disease, attention deficient hyperactivity disorder (ADHD), Huntingtons disease, Parkinsons and Schizophrenia.
