

Plexus Technology announces iOS 12 support for anesthesia touch

28 September 2018 | News

"As a professional, mission critical application, we want to ensure Anesthesia Touch on iOS works with the latest version from Apple. This ensures our customers benefit from the significant performance improvements in the release and continued security enhancements,"

Plexus Technology Group, LLC (Plexus TG), a market-leading, best-of-breed provider of anesthesia information management systems (AIMS), is pleased to announce that Anesthesia Touch™ is ready for Apple's iOS 12. Clients that wish to upgrade their devices to iOS 12 should coordinate with Plexus TG support.

"As a professional, mission critical application, we want to ensure Anesthesia Touch on iOS works with the latest version from Apple. This ensures our customers benefit from the significant performance improvements in the release and continued security enhancements," said Tony Mira, CEO of Plexus Technology Group.

Doug Marcey, CTO, continues, "Because Anesthesia Touch works across iOS, Windows and a cloud-hosted server environment, our Development and Quality Assurance teams are always working to ensure we support these major releases

in tandem as quickly as possible. We want to ensure customers can update their devices to take advantage of the new software."
