Merck to offer innovative thinking to Industry

20 November 2018 | News

As a part of its outreach to the industry Merck in India has launched an initiative for emerging startups at the Bio Economy India Conclave 2018 in Pune.

From drug discovery and development to manufacturing and diagnostics, the Life Science business of Merck is dedicated to solving the toughest problems in life science by collaborating with the global scientific community.

As a part of its outreach to the industry Merck in India has launched an initiative for emerging startups at the Bio Economy India Conclave 2018 in Pune. With this program Merck intends to collaborate with startups from incubation phase until they achieve a scalable solution or a final market ready product. Startups will benefit from the vast knowledge that Merck has amassed over the years, working closely with our customers from academia, biotech and pharma to help deliver the promise of their work better, faster and safer.

On registering at www.merckindiastartups.com Merck offers startups support with Regulatory Consultation, provide Access to Subject Matter Experts and opportunity to enroll in the training programs on offer.

Besides the above solutions a communication hub within the platform will drive networking among fellow startups, incubation centers, leading academic Institutes and, pharma & biotech companies across the country. This platform has the potential to be that social forum where the important stake holders of the Life Science industry can get together and interact virtually.

This is Merck’s offering to fuel innovative thinking and faster to market approach within the Life Science industry.
