

Cabinet approves UK-India Cancer initiative

07 March 2019 | News | By Manbeena Chawla

The India-UK Cancer Research Initiative is a collaborative 5-year bilateral research initiative by the Department of Biotechnology (DBT), Ministry of Science & Technology, India and Cancer Research UK (CRUK).

The Union Cabinet chaired by Prime Minister Narendra Modi has approved the Memorandum of Understanding (MoU) signed last year between India and U.K. on Cancer Research Initiative.

The India-UK Cancer Research Initiative will identify a core set of research challenges that address issues of affordability, prevention and care of cancer by bringing together leading Indian and UK experts across clinical research, demographic research, new technologies and physical sciences. The initiative will provide funding to develop new research alliances and undertake impactful research to enable significant progress against cancer outcomes.

The India-UK Cancer Research Initiative is a collaborative 5-year bilateral research initiative by the Department of Biotechnology (DBT), Ministry of Science & Technology, India and Cancer Research UK (CRUK) that will focus on affordable approaches to cancer. Both CRUK and DBT will invest £5 million (approx. 45 crores) each in this 5-year pilot, and seek further investment from other potential funding partners.
