Speaking on emerging priorities President, NATHEALTH, Dr. Sudarshan Ballal said, "this has been a truly tumultuous year for healthcare and the events of this year will certainly shape the future of healthcare in India. The greatest and biggest news and development of 2018 is the rolling out of NHPM or Ayushman Bharat by the central government providing Rs.5 lakh coverage to about 500 million poorer sections of the society. Stringent governmental regulations, increased public and media attention on the cost of healthcare will substantially affect the delivery of healthcare in our country. The effect of demonetization, GST and capping of prices would further impact healthcare in a big way. The greatest challenge for the healthcare sector is to deliver 1st world healthcare at 3rd world costs."
