24 April 2019 | Views | By Ankit Kankar

Wondering if B Pharmacy admission is right for you? Well, we will list down 5 reasons later in the article to leave the decision up to you. However, before that, let's shed some light on the B Pharma degree course and pharmacy in general.

Pharmacy is a great career option that has a strong scope with many lucrative opportunities. The pharmacy industry is massive in India and was valued at \$33 billion in 2017. The projection is that the pharmacy industry will reach \$55 billion at a CAGR of 22.4% by 2020. With such strong numbers, **B Pharmacy admission** makes up for a lucrative career for students. It's a 4-year degree program that is spread across 8 semesters.

*Here are 5 reasons why B Pharmacy admission is right for you*

### 1. You Want to Work With Patients

Once you get your B Pharma degree, you will be able to work in a lot of different settings. However, patients will be the primary people that will surround you. As a pharmacist, you will find your role across different healthcare settings including ambulatory, inpatient, and community. There are so many different and diverse roles available for a pharmacist that they work in multiple settings involving people.

As a pharmacist, in addition to providing medicines, there are other services that you would provide. Pharmacists provide asthma care, cholesterol screening, blood pressure monitoring services, smoking cessation consultation, diabetes disease management, bone density scans and more.

### 2. You Like Helping People

It may not come off as obvious, but pharmacists help patients to feel better. Since pharmacists are medication specialists, they are best equipped to make patients feel better about their situation.

Pharmacists also play a crucial role in improving medication adherence. The cultural competence of pharmacists such as

lifestyle, language, diet, and much more helps them to evaluate and make patients take medicines as prescribed by the doctor.

### 3. You Want to Have Diverse Career Opportunities

Yes, you're reading it right. Pharmacy is a diverse career with many opportunities in scientific research, development, patient care and entrepreneurship. There is a huge variety of job roles available for [pharmacists after B Pharmacy admission](#) and degree completion.

The most obvious choice for pharmacists is working in retail pharmacy, either in a healthcare facility or community. In this role, they provide over-the-counter (OTC) and prescription medications along with counselling to the patients. They can even work in the pharmaceutical industry, teach at university or conduct research.

Here's how a list of careers you can choose after B Pharmacy admission:

- Community Pharmacists
- Hospital Pharmacists
- Hospice/Palliative Care
- Health-Care Administration
- Pharmaceutical Companies
- Production Chemist
- Medical Representatives
- Regulatory Affairs
- Scientific Writing
- Medical Scripting
- Clinical Research
- Pharmacovigilance
- Higher Education – M. Pharmacy, MBA, Law, Patent Agent

After B Pharma, pharmacists can take the above roles and then move to key leadership roles across different aspects of the healthcare system.

### 4. You Want to Be an Important Part of Healthcare Team

Pharmacists play a critical and important role across all healthcare teams. There have been numerous studies on pharmacists, and the results have been consistent to show that they are one of the most important members of the healthcare team.

If you choose to pursue B Pharma, you would be an important part of the [healthcare](#) system and provide medication for management of various illnesses.

### 5. You Want a Stable yet Flexible Career

A bachelor's degree in pharmacy will provide stable employment throughout your career. With a degree, you would be able to work as a licensed pharmacist across the country.

Also, you have the privilege of choosing your work hours. For instance, you want your pharmacy to operate 24x7 – you can do that! Alternatively, if you want to work a night shift or in the emergency wing – you can do that too. Since the need for pharmacists is vast, there's much flexibility in this career.

If the five reasons mentioned above align with your goals, get B Pharmacy admission to make your dreams come true. B Pharmacy admission in universities like UPES allows students to pre-enrol before appearing for 12<sup>th</sup> boards if they have a

minimum of 50% in class 10<sup>th</sup>. The university is also rated QS 5 Stars for employability and is the first Indian university to receive this rating.
