Lucknow: The Catalyst For UP

The setting up of the Bt park in Lucknow has boosted the biotech activity in the State

The Lucknow Biotech Park was jointly setup by the Department of Biotechnology, Government of India and Department of Science and Technology, Government of Uttar Pradesh in collaboration with the Council of Scientific and Industrial Research, New Delhi; Indian Institute of Technology, Kanpur; local universities and industries. It is a technology incubator plus model. The park buildings were completed in July 2006 and in a few months time all available constructed space and available land has allocated to entrepreneurs.

While states like Andhra Pradesh, Karnataka, Maharashtra and Gujarat have taken a great lead in biotechnology, UP is comparatively new in their comparison. However, the setting up of the park has boosted the biotech activity in the state. The companies in the park are utilizing the common facilities as per their requirements. The park is playing a major role in providing them advisory and consultancy services. Nextgen- Biofertilizers and Aroma Products have expanded their activity outside the park in biofertilizer. Similarly the park has paved the way for launching of two new companies - Green Oil, New Delhi and U.P. Bioenergy Pvt. Ltd, Lucknow outside the park in the area of biofuel energy.

The park plays an important role in the initial establishment of the startup companies by providing information about possible business avenues based on the facilities set up at the incubator center of park, sourcing of technologies and state of the art

facilities available with various national R&D institutions, Universities and medical institutions, provides access to expertise available with renowned and accomplished scientists. It also provides them information about the facilities and incentives available under the Government of India and state government biotech policies, availability of special grants, schemes and loans as well as information about requirements for registration and obtaining IPR.

Expansion Plans

The future plans of park includes, constructing more ready to use laboratories keeping in view the high demand from new start up companies; setting up of a commercial solvent extraction plant for obtaining lead molecules in a public private partnership mode; setting up common facilities of safety evaluation and toxicity testing, analytical facility for food processing industries in public-private partnership; establishing new protocols for high yielding varieties of the *Jatropha curcas* plants and providing good planting material with particular emphasis on *Jatropha* and Banana; providing industrial biotechnology training in areas of molecular biology, bioinformatics, human DNA banking, agribiotechnology and providing Agri Biobusiness opportunities for rural development.

Companies / Institutions utilizing the incubation facilities

The limited constructed space of approximately 20,000 squarefeet. available with the park has been leased out to the following entrepreneurs for innovative research and services:

AquaBioChip Genomics (India) Pvt. Ltd, Lucknow

Aims to make high-end and sophisticated genetic marker-based screening tools accessible to everyone at an affordable price.

Clintech Research India Pvt. Ltd., Lucknow

A USA-based Clinical Research Organization (CRO) has set up their office in the Biobusiness Centre.

Cognate Bioservices Inc., USA

A GMP stem cell facility for cell based therapeutics. Plans for modification of two room to meet the GMP requirements are being prepared.

ACS Bioinformatics, Lucknow

The company undertakes R&D activities in the field of biotechnology services; and provides bioinformatics and patent filing services.

HH Biotechnologies Pvt. Ltd, Agra

A North India-based biotechnology company with a special focus on plant biotechnology proposes to produce biopharmaceuticals of non-therapeutic use.

IQRA Biotech Services, Lucknow

Has setup Human DNA Bank, first in this part of the country and proposes to setup an Umbilical Cord Blood Bank.

Sheel Biotech Ltd., Manesar

Plant Tissue Culture, R&D, Producing Banana, Bamboo, Gerbera and other plants.

Software Technology Parks of India, Lucknow

Provides lease link services, internet services and support for creation of central facility for computing.

Sepragen India Pvt. Ltd., India

A USA based company registered in India as Sepragen India Pvt. Ltd. will be manufacturing equipment and instruments for Sepragen's existing global bio-processing business.

Facilities being operated under Public-Private Partnership mode

The following facilities are being run under Public-Private Partnership mode:

Distillation and Vermicomposting Units

Next Gen " Biofertilizers & Aroma Products, Lucknow

Biofertilizer Unit

Next Gen " Biofertilizers & Aroma Products, Lucknow

Tissue Culture and Hardening Facility

Sheel Biotech, Manesar, Haryana

Entrepreneurs to whom developed plots have been provided

The vacant land of about 3.25 acres available with the park after setting up the common facilities and technology incubator has been provided to the following entrepreneurs for innovative bio-business and services:

Chandan Health Care Ltd., Lucknow

The company will set up a unit for testing and development of diagnostic kit.

Life Care Innovations Pvt. Ltd., Gurgaon

The company shall undertake R&D, product development, process development, scale-up, pilot plant and production for commercialization of new biotech products for health use including therapeutics, diagnostics and vaccines.

IQRA Biotech Services, Lucknow

This company would be setting up a human cord blood bank.
