

Hikma launches Cisplatin Injection

29 July 2019 | News

Today one in every six injectable generic medicines used in US hospitals is a Hikma product

Hikma Pharmaceuticals PLC the multinational pharmaceutical company, has launched Cisplatin Injection, 1mg/mL in 50mL and 100mL vials, in the United States through its US affiliate, Hikma Pharmaceuticals USA Inc.

Cisplatin Injection is indicated as therapy to be employed as follows:

Metastatic Testicular Tumors

In established combination therapy with other approved chemotherapeutic agents in patients with metastatic testicular tumors who have already received appropriate surgical and/or radiotherapeutic procedures.

Metastatic Ovarian Tumors

In established combination therapy with other approved chemotherapeutic agents in patients with metastatic ovarian tumors who have already received appropriate surgical and/or radiotherapeutic procedures. An established combination consists of Cisplatin Injection and cyclophosphamide. Cisplatin Injection, as a single agent, is indicated as secondary therapy in patients with metastatic ovarian tumors refractory to standard chemotherapy who have not previously received Cisplatin Injection therapy.

Advanced Bladder Cancer

Cisplatin Injection is indicated as a single agent for patients with transitional cell bladder cancer which is no longer amenable to local treatments, such as surgery and/or radiotherapy.

According to IQVIA, US sales of Cisplatin Injection, 1mg/mL in 50mL and 100mL, were approximately \$5 million in the 12

months ending May 2019.
