

Two new cases of coronavirus detected in India

02 March 2020 | News

Both the patients are stable and being closely monitored

Ministry of Health & Family welfare has confirmed two fresh cases of the new coronavirus in India. one positive case of the Covid-19 was detected in New Delhi, the other was reported from Telangana.

Both the patients are stable and being closely monitored.

As per the statement released by the Government, "Person from Delhi had travelled to Italy and the other visited Dubai. Both are stable and being closely monitored."

India has so far reported three confirmed cases of the virus, all in Kerala. All three from Kerala, who had tested positive for coronavirus, have recovered.

The three students, had earlier tested positive for the coronavirus on their return from Wuhan, the epicentre of the deadly outbreak that has left over 3,000 people dead in China.
