SHARP supply air purifiers to hospitals

17 April 2020 | News

Air Purifiers can play a pivotal role in ensuring air quality in the hospital by removing virus and bacteria from the air

SHARP, air Purifier manufacturer has decided to supply 44 units in total of their latest air purifiers to Safdarjung Hospital (20 units) and Civil Surgeon Hospitals in Gurgaon (20 units) and Panchkula (4 units).

SHARP Air Purifiers can play a pivotal role in ensuring air quality in the hospital by removing virus and bacteria from the Air, and help in limiting cross-infection. Highest numbers of deaths are coming from the infected patients who are immunecompromised.

This should also help to reduce the total viral load in the air where the Doctors and Nurses are toiling day and night.

Speaking on the development, Shinji Minatogawa, Managing Director, SHARP Business Systems (India) Pvt. Ltd. Commented, “As a responsible organization, we are pledged to support the country in the fight against COVID-19. We acknowledge that hospitals and its medical staff are our first defenders against the pandemic and providing a safe and clean hospital wards free of pollutants is our top priority.”

Very recently, SHARP in association with Dr. Sagnik Dey and Dr.Gazala Habib of IIT Delhi published their latest research about SHARP’s Innovative and Patented Plasmacluster Ion Technology that can effectively remove 3 types of PAHs (Polycyclic Aromatic Hydrocarbons) known to be extremely harmful towards the human body.
