"We need to think about mega industrial parks"- K T Rama Rao

15 June 2020 | Views

K T Rama Rao, Minister for Municipal Administration & Urban Development, Industries, IT, E&C, Govt of Telangana talks about boosting the economy post COVID-19

"We need to think of scale, we need to think about mega industrial parks. The world's largest pharma cluster in the form of Hyderabad Pharma City will be coming up in Telangana in the next few months. This will reduce dependence on any other market across the world. Telangana is open for business and we are looking for investments in high employment generating sectors like textiles, electronics, life sciences, IT, and we will continue our endeavour to bring more investments. COVID-19 has been a challenge for governments across the world. In a developing nation like India, we will have to ensure that lives and livelihoods are balanced. At the same time, the country by and large cannot afford to shut out economic activities completely."
