

Thermo Fisher brings virtual LCMS event

18 June 2020 | News | By Manbeena Chawla

One can discover the innovative mass spectrometry systems

[Register Now](#) - to the **Thermo Fisher Scientific virtual LCMS Conference** – an exclusive event specially curated with a focus on Orbitrap technology and beyond.

23 June 2020, Tuesday | 10:30 IST

The scientific community, with expertise in discoveries, breakthrough and innovations, is being pushed to deal with challenges daily. Our best efforts always come from collaboration and sharing of information and expertise.

With this in mind, we bring together some of the leading experts through the Thermo Fisher Scientific virtual LCMS Conference – an exclusive event on state-of-the-art mass spectrometry with a focus on Orbitrap technology. Our experts will also be sharing about the latest Exploris MS systems and their applications in this event.

Join us at our virtual conference to:

- Attend plenary presentation by Professor Alexander Makarov – “Designing the Smallest Ever Orbitrap Mass Spectrometer for New HRAM Applications”.
- Learn and gain valuable insights from mass spectrometry experts about Orbitrap mass spectrometry technology and the applications it enables.
- Explore the LCMS portfolio and meet the expanded Orbitrap Exploris MS systems in our Exhibit Hall and dedicated booths.
- Venture into our poster vault for numerous poster presentations.
- Interact and discuss your questions with fellow scientists and experts online in live Chat Chamber. Dedicated live chats are also available in English, Japanese and Korean by fellow scientists and experts online.
- Challenge yourself in our recreation room available after the conference to win exclusive giveaways.

Certificate of Attendance will be awarded to attendees who join us during our live virtual conference.
