GE Healthcare Edison graduates 5 startups at demo day

24 June 2020 | News

Edison[X] has now opened registrations for its second cohort

GE Healthcare has announced the graduation of its first batch of startups who were part of Cohort-1 of 'Edison[X] - Startups powered by GE Healthcare', its startup collaboration program based out of India.

The Demo Day featured five impressive health tech startups, each solving some of the most critical healthcare challenges including Covid-19.

The startups -- 5C Network, DeepTek, Orbo, Predible and Synapsica showcased their clinical solution, business model, market opportunity and projections to a virtual audience comprising of startups, investors, healthcare players and other corporates.

Nalinikanth Gollagunta, Managing Director, Wipro GE Healthcare, South Asia said, "I am extremely proud of the founders of our first Csohort for the exciting and innovative businesses they are building. Their strength lies in their ability to match their unique technical knowledge and deep business skills to real world healthcare problems. Each of these startups are working on areas that are extremely relevant to GE and our customers. Their game changing solutions are complementary to our offerings and address significant healthcare challenges that exist today. We are looking to offer our customers those choices and intend to partner with start-ups of Cohort-1 on relevant engagement models including taking these solutions to the market and offer them an opportunity to build scale."

ABOUT THE FIVE STARTUPS:

1. 5C NETWORK: India's first diagnostics network, making radiodiagnosis more accessible, affordable and accurate through technology. www.5cnetwork.com
2. DEEPTEK: leveraging AI to develop a platform that increases the productivity and quality of image analysis. www.deeptek.ai
3. ORBO: Extracting the real truth inside images using Visual Enhancement Stack. www.orbo.ai
