Partnership with Hospitality players in Bengaluru to set up COVID care centres for mild and asymptomatic patients

In an endeavour to intensify the fight against the pandemic, Manipal Health Enterprises part of Manipal Education and Medical Group (MEMG) collaborates with the Government of Karnataka and converts its 100 bed fully equipped facility at Malleshwaram as a dedicated COVID unit.

The facility is equipped with a 14-bed respiratory ICU and state of the art equipment to ensure seamless and efficient treatment to COVID patients.

The facility also has back up imaging and a full-fledged laboratory to ensure the highest level of care to COVID 19 patients. The Group has also been approved by the regulatory authorities to perform COVID 19 Testing at its Hospital on Old Airport, Bangalore and Udupi.

The group has been working closely with the Government of Karnataka since March when the pandemic started to breakout in the State.

The Chairman of Manipal Hospitals, Dr. Sudarshan Ballal was a key member of the Task Force formed by the Govt to help combat the spread of the virus. Over the last 3 months, a specialist team comprising of a Physician/Geriatrician, Intensivist, Pulmonologists, Anaesthesiologist and Nephrologist have been monitoring critically ill COVID – 19 patients across 7 districts of Karnataka via the E-Rounds initiative.

The dedicated team of specialists were part of the war room to provide video consultations to critically ill patients twice a day. In the month of April, Dr TMA Hospital, a 150 bed facility in Udupi was converted to a dedicated COVID centre and became the only private Hospital in Karnataka to be designated as a COVID – 19 Hospital and has treated over 150 patients.
