Japan brings virus prevention solution to India

02 July 2020 | News

New hope to reduce infection rates in the current situation

A Japanese based company KiyouJochugikuCo. Ltd has launched “Air Doctor” in India. The Air Doctor is a portable product that helps prevent viruses, bacteria, and fungito come in contact with the user within a 1-meter radius.

The product Air Doctor contains sodium chlorite, natural inorganic substances (natural zeolite) which helps in the prevention of virus.

Air Doctor can be hanged on chest, pocket, or bag and this Japanese based technology releases antimicrobial agent Chlorine Dioxide (ClO_2) to provide ultimate protection against airborne diseases such as influenza, cold and flu, allergy, H1N1, pneumonia, tuberculosis, recurrence respiratory infections etc.

This product is also advisable to patients living with asthma and immunocompromised patients with hypertension, diabetics, heart disease, cancer patients under chemotherapy etc. Even children, pediatric and pregnant women can safely use it. The Air Doctor product is approved worldwide by the WHO, USFDA, Occupation Safety and Health Administration and The Japan Ministry of Health, Welfare & Labor.

Mr. Jitendra Bhatt, CEO of Access BioImage,the Indian Promotor of the Air Doctor says, “At this crucial time, when we are fighting against the pandemic, ‘Air Doctor’ will be useful to scan the virus within 1-metre radius after wearing it. The portable product which is like a badge can be used by everyone including educational institutions, healthcare & hospitality industry, private and government offices, policeman, flights, banks, showrooms, restaurants, public transport, aviation etc. The product can also be placed inside or outside air conditioners to prevent from Air Borne disease.”

Air Doctor claims that it uses a new generation of virus prevention, sterilization, and deodorization techniques. There are 3 variants available:

1. Air Doctor Fan that has 90 days effect and advisable for the use in hospitals
2. Air doctor Mobile which prevents virus and bad odor
3. Air Doctor Mobile portable which effectively kills pathogenic microorganism such as fungus, bacteria, and virus and both the mobile versions last for 30 days.

Mr. Jitendra Bhatt further adds, “Air Doctor is beneficial for all the citizens working on essential duties and can use the Air Doctor portable to prevent themselves from the virus exposure and thereby minimize risks.”

The product is not accessible to use under water and exposure to high air should be avoided
