

"Stryker has designed and manufactured locally a face shield"- Meenakshi Nevatia

20 July 2020 | Views | By Manbeena Chawla

Meenakshi Nevatia, Managing Director, Stryker India, Gurugram talks about how the company is contributing to this fight against COVID-19

"Our mission at Stryker is to work together with our customers to make healthcare better. And during the Covid crisis in India this has come to life in a more meaningful way than ever before. In India, we are uniquely positioned given the presence of one of our large global R&D facilities established in Gurgaon. In response to the rising PPE requirements from healthcare

providers, we worked with our R&D teams to design and manufacture locally a Face Shield. Face shields provide protection to healthcare practitioners and healthcare workers by reducing their exposure to large infectious aerosol particles that are the primary cause of COVID-19 transmission while caring for patients. We stand committed to meeting the critical service and supply needs of our customers so that they can focus on taking care of all patients during these difficult times.”
