RJ Group forays into PPE space

30 July 2020 | News

RJ Group will also introduce a wide product range with UV-C Disinfection system

Mumbai based RJ Group, a leading manufacturer and exporter of hospitality products, has forayed into the healthcare space with the launch of its SSMMS & REUSABLE PPE Kit.

In this segment the company is offering a range of safety products like Surgical Gown, Coverall suit, Doctor's Gown, Doctor's Apron, ICU Coverall for medical professionals.

Under its healthcare venture the company plans to produce 3200 Units of PPE Kit per day from each of its manufacturing units. Thus, answering the government call of making India 'Aatmanirbhar'. To ensure their quality, products are made out of SITRA and are manufactured from DRDO approved Factories.

Furthermore, these kits consist of SITRA approved PPE Fabrics and adhere to CE, FDA, ISO 13485 quality standards. These Kits are designed from the world's Leading Safety gear Manufacturer DUPONT's Tyvek Fabric and also from India's Renowned Jindal Fabric and other Leading Fabric manufacturers.

Additionally, RJ Group will also introduce a wide product range with UV-C Disinfection system, which has been validated to effectively inactivate SARS-CoV-2, the virus that causes COVID-19. It's the first Indian firm to make Conveyor Belt sanitization systems and the very first firm in the world to have invented a toilet light disinfection system for which it holds the patent. To meet the growing demand for products in the health security space, RJ Group has developed this defence range for fighting efficiently against COVID-19.

RJ Group is also in process of Launching First time in India – Anti Microbial and Anti-Viral, Reusable Bedsheet, Pillow covers, Screen Cloths. In the disposable category, they have introduced bedsheets and pillow covers, surgeon gowns, bouffant caps, etc.
