

Tattvan E-clinics offer affordable & customized tele-health solutions

31 July 2020 | News | By Pooja Yadav

Tattvan e-clinics are creating value by offering extremely affordable and customized tele-health solutions for corporate employees.

In the time of the pandemic, many companies are evaluating options to provide hassle-free solutions for the well-being of their employees and improve efficiency and productivity. To improve the well-being of employees, Delhi based Tattvan e-clinics are creating value by offering extremely affordable and customized tele-health solutions for corporate employees.

A virtual tele-health ecosystem for corporate employees including specialized support for COVID19 is changing workplace wellbeing dynamics. Tattvan's workplace wellbeing program is of particular use to companies in times of 'work from home'. The program helps companies to reduce employee healthcare costs, boost productivity, improve employee satisfaction with the company, and also create a culture of solid employee engagement.

With the help, mobile application one can book Appointments, do unlimited text, phone or video consultations with specialists from Modern medicine, Ayurveda, and Homeopathy, track 50+ parameters via our trackers on daily basis, participate in remote monitoring programs and much more, participate in mental wellbeing programs, get unlimited access to Tattvan's Second Opinion Service, unlimited physiology and vital diagnostics, discounts on pathology and radiology tests and also maintain their own and family members health records online and share with physicians.
