Vector Informatik supports COVID-19 testing for underprivileged citizens

11 August 2020 | News

Vector Informatik India, has undertaken initiatives to contribute and invest INR 55 Lakhs towards COVID-19 testing amongst citizens from weaker section of society residing in Pune and Mumbai.

Mumbai based Vector Informatik globally helps shape social values through its extensive involvement and attempts to reduce the social risks facing the general public. In line with its values Vector Informatik India, a 100% subsidiary of Vector Informatik GmbH has undertaken initiatives to contribute and invest Rs 55 Lakhs towards COVID-19 testing amongst citizens from weaker section of society residing in Pune and Mumbai.

Vector India has collaborated with Krsnaa Diagnostics in Pune and the testing will be done at identified sites for the people residing in low-income zones. In Mumbai, Vector India has partnered with voluntary organization, Be Human Foundation to facilitate testing at Brihan Mumbai Corporation (BMC) identified labs and a mobile vehicle is deployed for collection of samples which facilitates increased reach across the underprivileged sections of city.

The entire project was planned by Vector India's Corporate Social responsibility (CSR) committee in collaboration with Krsnaa Diagnostics, Pune and Be Human Foundation, Mumbai. Vector India employees have also taken efforts at their personal level to support stranded people in various parts of our country by volunteering for food distribution and contributed to different non-profit foundations working towards helping people affected by the pandemic.
