Tattvan launches e-clinics to provide healthcare facilities in Jaipur

07 October 2020 | News

To solve the issue of a smaller number of doctors and availability of healthcare facilities

Telemedicine startup, Tattvan based out in Gurugram is planning to expand its operations in Rajasthan to provide advanced healthcare facilities to the people. Tattvan has announced the launch of its new e-clinics in the Khora Shyamdas village and

Thikariya village of Jaipur district in Rajasthan, India.

These clinics will provide comprehensive and holistic healthcare solutions to the residents of the community as well as to solve the issue of availability of less number of healthcare professionals and facilities. Residents will enjoy the benefit of teleconsultations, diagnostic services, and access to a pharmacy.

Tattvan is India's first-of-its-kind telemedicine company that established a widespread telemedicine business with its 'brick & mortar' model that has a clear motto of providing the best medical diagnosis, prompt cure, right guidance, and best consultancy, anywhere.

With the help of Tattvan's telemedicine platform, residents will receive the medical advice of healthcare professionals who are practicing in some of the leading hospitals nearby at an affordable price. Furthermore, Tattvan has already registered more than 100 specialist doctors from Jaipur alone, so that all sorts of diseases and issues can be addressed.

To ensure their well-being, periodic check-ups will be performed and diagnostic services will be available at the clinics. Tattvan is working towards the growth of the digital health system in India and will maintain electronic health records of the patients to keep them secure which will be accessible by patients and doctors from anywhere in the world.
