*Offer Available in Bangalore, Chennai, Hyderabad, Mumbai, Delhi NCR

October is Breast Cancer Awareness Month giving us a good opportunity to create more awareness amongst people about breast cancer and the importance of early detection. Every year around this month Bangalore based Niramai, an AI-based health tech company offers breast cancer awareness, initiates various screening camps, and offers a bunch of discounts to encourage women to take the first step towards breast health.

They ensure as many people as possible hear and understand the breast awareness message whether that's through social media or one of the women's health webinars.

Niramai has special offers to empower women with knowledge about their health and wellbeing.

Some of the initiatives by team Niramai

- 40% discount on all breast health services
- Sponsored second screening at a 50% discount
- Online breast health assessment test - (Free until 15th October)
- This allows you to get a complete breast health check

Through their services, Niramai aims to educate women about their breast health and urge others to support them in promoting breast cancer awareness.
