

## DPSRU, DRSC unveil open-access quadrimester online scientific journal

16 October 2020 | News

The Healthcare e-compendium will be circulated to HCPs through emails, social media, WhatsApp, LinkedIn, Twitter and Facebook

Healthcare e-Compendium is the joint initiative of DPSRU (Delhi Pharmaceutical Sciences and Research University), first Pharmacy University of India and DRSC (Doctors' Resource and Science Centre for Continuing Education).

It is an open-access Quadrimester online scientific journal - a source of the latest medical articles, case studies, food & nutrition updates, topics on manufacturing excellence and global brands.

Eminent Doctors and HCPs from India and abroad have contributed their articles in the inaugural issue released in September 2020. DRSC is supported by Alniche Lifesciences under their scientific program to support medical fraternity.

In the current situation, Digital technology in healthcare has a positive impact in terms of speed of giving information and a non-contact interaction with healthcare professionals. Almost all the information is exchanged digitally - Telemedicine, Artificial Intelligence (AI) - enabled medical devices for diagnosis, robotic surgery, health records are just a few examples of digital transformation in healthcare. This platform provides an opportunity to HCPs for sharing their clinical knowledge with their peers both in India and globally.

The Healthcare e-compendium will be circulated to HCPs through emails, social media, WhatsApp, LinkedIn, Twitter and Facebook. In addition, Alniche is conducting regular online CMEs/Webinars, sharing latest scientific articles through WebPosters/videos and advisory issued by ICMR/MoHFW, with an objective that HCPs remain updated to handle COVID-19 patients.
