Asian Institute of Nephrology and Urology announces expansion in Hyderabad

02 November 2020 | News

It is AINUâ??s fourth facility in Hyderabad and itâ??s a 50-bedded kidney care center with dedicated beds for intensive care

Asian Institute of Nephrology & Urology (AINU), a world-class, single-specialty, South India’s largest centre for renal sciences hospital is expanding its presence in Hyderabad by adding new facility to its existing capacity.

Cyberabad Police Commissioner Sri V.C. Sajjanar has inaugurated the hospital. Dr Mallikarjuna, Managing Director, Dr CP Reddy, Executive Director, Dr Deepak Reddy, Facility Head, Dr Taif, Nephrologist, Dr Varun, Nephrologist have participated in the inaugural event.

It is AINU's fourth facility in Hyderabad and it's a 50-bedded kidney care center with dedicated beds for intensive care. A total of 70 staff including doctors and support staff will be working at Hitec city facility.

Established in 2013, AINU is a specialized urology and nephrology-focused tertiary care hospital, offering a full suite of medical, surgical, day care and supporting services. The new facility will house a specialized dialysis unit of 10 beds with an advanced HDF dialysis capable units for critically ill patients. A dedicated team of fulltime urologists and nephrologists are available 24x7 to provide quality care to the patients.

Over the past 7 years, the NABH accredited AINU has established itself as a premier institute with over 250 beds dedicated to kidney care. AINU is equipped with both surgical and acute kidney intensive care units; and has emerged as a referral center for complex and high-end endoscopic, laparoscopic and robotic urological procedures for kidney stones, prostate enlargement, kidney cancer, prostate cancer, urinary bladder cancer, congenital urinary tract disorders and Kidney transplantation to name a few.

Commenting on the new facility, Dr. C Mallikarjuna, Managing Director, said "Asian Institute of Nephrology & Urology is renowned for its world-class infrastructure and advanced medical support. The new facility will serve in and around Hitec city of Hyderabad. It is equipped with a comprehensive in-house laboratory and diagnostic facilities comprising of X-ray, Ultrasound, Multi-slice CT scan and Urodynamics. There are two fully equipped operating rooms specifically designed for urological procedures with all the latest surgical equipment like Lasers to perform high-end endoscopic and laparoscopic surgeries."

"AINU is well equipped with state-of-the-art HDF dialysis machines at acute kidney care unit to deal with nephrological emergencies and an enviable track record in delivering a successful renal transplantation program. The prime focus at AINU has always been on advancing the knowledge of renal care among the fraternity," concluded Dr. Purna Chandra Reddy, Executive Director.
