Neuberg Supratech launches RT-PCR test counter at Sardar Vallabhbhai Patel International Airport

11 January 2021 | News

The test is available for all international arrivals as well as to domestic travellers arriving and departing from the airport. The hard copy of the test result will be given within 6-8 hours to all the passengers undergoing COVID-19 test

Neuberg Supratech has launched a round-the-clock RT-PCR test counter for flyers at Sardar Vallabhbhai Patel International Airport. The test conducted is fully in adherence to the standards mandated by the Indian Council of Medical Research (ICMR) and the state government, which aims to provide a quick and accurate diagnosis to travellers. The airport management has undertaken this step to enable travellers to take necessary measures to prevent transmission.

The test is available for all international arrivals as well as to domestic travellers arriving and departing from the airport. The hard copy of the test result will be given within 6-8 hours to all the passengers undergoing COVID-19 test.

Dr Sandip Shah, Executive Director, Neuberg Diagnostics said, “In tandem with Ahmedabad Airport, we have set up a RT-PCR test counter for increasing the testing capacity. In case the report is positive, then as per guidelines, the subsequent measures will be undertaken. This initiative will ensure the convenience of travellers as well as will help manage the rush of back-to-back flight arrivals smoothly.”
