# Qural unveils new features to address COVID-19 vaccination queries

28 January 2021 | News

The two new features 'My Vaccine' and 'Vaccine Monitor' are free to use and will help the users find answers to several questions that are related to vaccination

Qural, a smart mobile healthcare app with a simple dashboard, UI and UX features, that enables users to take control of their health information, has announced the launch of two new mobile features, that will address all the doubts and questions that are in the minds of people about COVID-19 vaccination. The two new features 'My Vaccine' and 'Vaccine Monitor' are free to use and will help the users find answers to several questions that are related to vaccination.

The developer of Qural App based in Hyderabad, is a subsidiary of the US headquartered Saince Inc. Qural was designed keeping in mind the need to provide access to affordable healthcare to people across the country.

Raghu Vir, Founder and CEO, Saince Inc & Qural App, reveals, "My Vaccine & Vaccine Monitor are built using our proprietary technology. While Qural's My Vaccine is developed by taking into consideration the priorities of population segments decided by the Government of India, like production capacity of the vaccines, the number and spacing of shots etc and to get an idea of when will one get his or her vaccination, Vaccine Monitor, help users to keep track of the side effects of the vaccine after they receive their first and the second vaccine doses. The new feature also proactively sends alerts and reminders to users to keep track of their vaccination."

He added, "We have done extensive scientific research and created an algorithm based on current guidelines from the Government of India, made it flexible, even if regulators change the rules in the future."

Hyderabad based Saince HealthTech's Qural App launched earlier, is a free-to-subscribe, healthcare mobile app to aid patients, physicians, pharmacies, and labs interconnect with each other.
