

Kauvery Hospital unveils new Cardiac Cathlab in Bengaluru

19 February 2021 | News

The newly built cath lab has adopted Philips Azurion-7 C12 technology, which enables it to conduct advanced surgeries to cardiac patients. Philips Azurion-7 C12 technology adopted surgeries to attain more accountability. Through this doctors can get better quality images, in less radiation dose

Kauvery Hospital, Bengaluru has newly constructed a 'Cardiac Cathlab' centre for cardiac treatment. The newly built centre in Kauvery Hospital at Konappana Agrahara was inaugurated by Dr CN Manjunath, Director, Sri Jayadeva Institute of Cardiovascular Sciences and Research. Senior cardiac experts of Kauvery Hospital Dr G Vivek, Dr Ganesh Nallur Shivu, were present in during the inauguration.

The newly built cath lab has adopted Philips Azurion-7 C12 technology, which enables it to conduct advanced surgeries to cardiac patients. Philips Azurion-7 C12 technology adopted surgeries to attain more accountability. Through this doctors can get better quality images, in less radiation dose.

This technology has been adopted in consultation with world class doctors, as the cardiac diseases are taking new shapes and are difficult to identify. Thus this technology is more useful and provides everything in one touch.
