Medtronic unveils engineering and innovation centre in Hyderabad

07 April 2021 | News

To Be the Largest Research and Development Center Outside the U.S. for Medtronic

Medtronic plc has announced the inauguration of its newly expanded state-of-the-art Medtronic Engineering and Innovation Center (MEIC) in Hyderabad.

The research and development facility was inaugurated by KT Rama Rao, Minister for Municipal Administration & Urban Development, Industries & Commerce, and Information Technology and his team of officials from the Government of Telangana.

The 150,000 square feet center employs engineers currently in the areas of software development and testing, test automation, mechanical design, analysis and hardware.

With this expansion, MEIC aims to leverage the sizeable pool of diverse and skilled talent in India to continue its pioneering work in the medical technology space and add further to Medtronic's 150+ patents and 400+ IP disclosures globally that MEIC has been a part of.

Speaking at the inauguration function, Madan Krishnan, vice president and managing director, India Medtronic Pvt Ltd., said, "Hyderabad is positioned to become India's hub for technology companies across the world. We see enormous potential in energizing the medical devices innovation ecosystem in the country. The R&D team in India is a key contributor to Medtronic's global product development. The opening of the new site is an important milestone for us as it serves as a critical component in strengthening our global R&D organization and will also drive innovation and growth."
