Pune Municipal Corporation inks PPP agreement for COVID-19 vaccination

30 April 2021 | News

Indiaâ??s first mobile vaccination player to be empaneled by PMC for Indian Governmentâ??s Covid Immunization Drive to setup & run Vaccination Booths

VaccineOnWheels (VOW), India's first and only doctor based mobile vaccination clinic, dedicated to serve the underprivileged communities in India, has announced that the organization has entered in a PPP (Public Private Partnership) service agreement with Pune Municipal Corporation (PMC) as its on-ground Covid-19 vaccination administration partner.

VaccineOnWheels and PMC together will provide vaccination services to adults and elderly people by setting up vaccination booths near communities with an ultimate aim of increasing immunization penetration.

VaccineOnWheels will deploy 15 vaccination units, wherein each unit will administer around 150 doses of Covid vaccines a day. As part of the protocol, every vaccination booth will have qualified doctors, nurses, and healthcare support staffs along with one ambulance on standby for any emergency support required in case of AEFI (Adverse Event Following Immunization).

VaccineOnWheels in partnership with Rotary Club of Pune Central will bring together NGOs and CSR partners to fund various resources required to deploy 15 mobile vaccination units to immunize more than 1 Lac people in a single month within Pune's Municipal Corporation area. Its unique PPP model will undertake a complex orchestration of multiple activities – from procurement to deployment, awareness to mobilization, registration to inoculation with support of multiple stakeholders.

The partnership between stakeholders is built to enable transparency, ease of access, and equity that will collectively accelerate a return to normalcy. The organization aims to immunize over 1 million Indians in a span of 8 to 12 months in partnerships with various state governments across India.
