

First Indo-UK clinic opens in Ludhiana

05 May 2021 | News

The ground-breaking of the first Medicity at Nagpur is scheduled during Prime Minister of the UK, Boris Johnson's visit to India later this year

Indo UK Clinics (IUCs), an integral part of one of the largest healthcare projects in the world encompassing 5000 clinics and 11 Medicities pan-India using NHS expertise, equipment and suppliers gets started with the first Indo UK Clinic becoming operational in Ludhiana, Punjab.

The objective of setting up 5000 diagnostic centres and clinics is a part of inter-governmental discussions between India and the UK at the Commonwealth Heads of Government Meeting (CHOGM) level in 2018.

In fact, the ground-breaking of the first Medicity at Nagpur (Maharashtra) is scheduled during Prime Minister of the UK, Boris Johnson's visit to India later this year.

IUCs offer primary healthcare services, state-of-the-art radiology based diagnostic imaging services, and artificial intelligence (AI) enabled telemedicine services. Wipro-GE has installed the latest CT scan, digital X-ray, ultrasound equipment at the IUC Ludhiana facility. Advanced pathology diagnostics and pharmacy services will also be available in the immediate future.

Dr Rajdeep S. Chhina, COO, MD Radiology and Head IUC Ludhiana, said, "The first IUC and the subsequent one will be set up in 30 days to cater to diagnostic needs in this pandemic. We are partnering with GE Wipro to provide cutting edge technology and with world-famous National Health Service in the UK to have the best Standard Operating Protocols and quality."

According to Dr Ajay Rajan Gupta, Managing Director and Group CEO, IUIH & IUCs, "During this pandemic, we want to enhance our contribution to the Indian healthcare diagnostic space by setting up 5 Indo UK Clinics this financial year. After the successful launch of the first IUC in Ludhiana, we are opening the second IUC in Patiala at an existing Covid Hospital."
