

Manipal University Jaipur to organise webinar on fungal infections post covid

04 June 2021 | News

Discussions will be held on the recent occurrence of Mucormycosis as a severe post-COVID secondary infection along with basic information about fungus

Department of Biosciences, Manipal University Jaipur, is organising an international online conference on 'Post COVID- 19 associated Black & White Fungal Infections' - an Awareness Initiative: Disease has no Color!" on June 14, 2021.

The main objective of this conference is to bring together medical experts, researchers and practising clinicians, individuals working in academia to discuss the recent occurrence of Mucormycosis as a severe post-COVID secondary infection along with basic information about fungus.

During the webinar, the viewers will:

- Gain an understanding of the specific causative fungus, aetiology, pathogenesis, precautions and treatments strategies for Mucormycosis.
- Learn about efforts to overcome Mucormycosis by routine lab investigations.
- Review the participating factors.
- Raise awareness regarding Mucormycosis (Black Fungus)
- Answer your questions live!

There are no registration charges to attend the event and E-certificate will be provided to all attendees. Participants can use the link to register: <https://forms.gle/6SttbH7qqVcSwway9>
