KareXpert plans to digitally transform 100,000 hospitals globally

05 July 2021 | News

The latest announcement is in line with the companyâ??s mission to provide digital healthcare services in Indiaâ??s top 100 cities

KareXpert, the Jio-backed, SaaS-based digital healthcare platform providing an integrated solution for the entire healthcare industry, plans to digitally transform 100,000 hospitals by FY2026. The company has already signed up Reliance Foundation Hospitals, Mahindra group Center for Sight Pan India Hospitals, and reputed 20+ large and medium hospitals, helping them improve patient care, optimise operations costs and increase revenues.

With its AI-ready healthcare data lake, KareXpert is targeting this challenge by facilitating better ease of access and sharing of information among providers, payers and patients. From data storing and workflow management to diagnostics and billing, by bringing everything into one platform, KareXpert's integrated approach is further enabling hospitals to streamline patient data flow across geographies and devices, lower costs and achieve a higher degree of collaboration between all stakeholders in the healthcare system.

KareXpert's technology is implemented at some of India's best hospitals and healthcare clinics across 100+ Facilities, 5000+ beds, and 1000+ doctors to digitally transform their business processes. The company has also partnered with state governments in India to facilitate better access to healthcare services in remote areas.
