B Medical Systems join hands with 1mg

07 July 2021 | News

B Medical Systems is supplying ultra-low freezers and transport boxes to 1mg for the storage and transport of COVID-19 vaccines

B Medical Systems has signed a collaboration agreement with 1mg to safely store and transport COVID-19 vaccines for its immunisation drives across the country. Under the agreement, B Medical Systems will support 1mg’s COVID-19vaccination campaign across metros and Tier 1 cities. Under the collaboration, B Medical Systems is supplying ultra-low freezers and transport boxes to 1mg for the storage and transport of COVID-19 vaccines.

“Our products will ensure that none of the vials is exposed to temperature excursions and vaccines are administered in their fullest potency. Our remote monitoring solutions ensure that there is end-to-end traceability of the storage conditions,’’ said Jesal Doshi, CEO, B Medical Systems India.

“The cold chain technology offered by B Medical Systems brings us one step closer to this goal by expanding access to vaccines while ensuring the highest standards of cold chain maintenance," said Varun Mimani, VP Supply Chain, 1mg.
