

RTI unveils project H.E.A.L to improve medical infra

26 August 2021 | News

H.E.A.L has already undertaken relief projects worth Rs. 55 Crore in partnership with various corporates

Round Table India (RTI), a service organisation, has launched Project H.E.A.L (Healthcare Enhancement for Active Living) with the aim to facilitate the improvement of medical infrastructure across the country.

At launch, H.E.A.L has already undertaken relief projects worth Rs 55 Crore in partnership with various corporates.

Project H.E.A.L entails movable or permanent infrastructure intervention such as building augmentation/repairs, creation of special wards, toilets, donation of medical equipment like ventilators, COVID-19 vaccine refrigerators, oxygen line systems, oxygen concentrators, ambulances and hospital cots.

Donations worth Rs 12 crore have been made by members to facilitate and improve medical facilities across the country.

Some projects which have been initiated under Project H.E.A.L include:

- Rs 7 crore hospital infrastructure interventions across the country with Cognizant Outreach, Vestige Marketing, etc. alike to encourage its network to join the cause and support India's COVID relief.
- Rs 8.78 crore infrastructure donations across Bengaluru in partnership with corporate donors like Swiss-Re, Blackstone, Embassy Group, Yahoo Employee Foundation India (YEFI), etc.
- Rs 3 crores in the oxygen line setups across the country with the Sood Charity Foundation
- Rs 25 crore govt. and charitable hospital equipment augmentation project with the Association of 41ers Club of India under Project ONEMOREBREATH (OMB).
