SRAM & MRAM Group sets up first oxygen plant in Sikar fast-track mode

27 August 2021 | News

The plant is capable to produce 150 units of oxygen cylinders in a day

SRAM & MRAM Group, a leading conglomerate along with ATD Group, has set up new oxygen manufacturing plant in Sikar (Rajasthan). The latest installation drive is a part under 'fast-track mode' to assist hospitals facing an acute shortage of medical oxygen.

SRAM & MRAM Group along with ATD Group has been aiding in setting up of local health structure. The group has been working actively and will be setting up nearly 60 plants. The group has successfully installed its recent plant at Sikar (Rajasthan), which will be operational shortly. The plant is capable to produce 150 units of oxygen cylinders in a day.
