DTDC, Narayana Health set up oxygen generator plant in Jaipur

13 September 2021 | News

The plant can generate medical-grade oxygen at 500 litres a minute

DTDC and its strategic partner, Geopost SA (DPD Group), owned by France’s Le Groupe La Poste, have associated with Narayana Hrudayalaya Charitable Trust and Narayana Hrudayalaya for the successful set-up and inauguration of an oxygen generator plant in Jaipur.

The one-of-its-kind oxygen generator plant was inaugurated by DTDC CMD Subhasish Chakraborty, in the presence of top officials from DTDC and Narayana Health. The valuable joint -initiative, installed in the Narayana multi-speciality hospital in Jaipur, is geared to help the country fight the ongoing Covid pandemic. The plant can generate medical-grade oxygen at 500 litres a minute.

Chakraborty said, “The cutting-edge oxygen generator plant, imported from the US, is a result of joint efforts of DTDC, our strategic partner, Geopost SA (DPD Group) and the able team at Narayana Health. As a part of our CSR program for covid care support, we have made a significant contribution of Rs 1.56 crore to Narayana Hrudayalaya Charitable Trust. DTDC and Geopost SA (DPD Group) also ensured the seamless logistical movement of the oxygen generator plant."

Arunesh Punetha, Regional director, Narayana Health said, “We are confident that with DTDC Express as our partners, we will be able to touch & positively impact thousands of lives together. Both the organisations will continue to support the people of Jaipur & Rajasthan in tiding over these challenging times”.
