

Aeris Communications launches Enterprise Voice Solution – Claerityai in India

16 September 2021 | News

The latest speech enhancement technology is powered by AI

Aeris Communications has launched the Enterprise Voice Solution – Claerityai – the latest speech enhancement technology powered by AI through a virtual conference in India. Claerityai improves productivity by removing all unwanted background noise from virtual meetings. Claerityai seamlessly integrates with various collaboration tools like Teams, Zoom, Google Meet and similar tools. Designed for enterprises, this single solution has centralised user provisioning and works securely across the entire user base.

Marc Jones, Chairman and CEO, Aeris Communications said “The technologies of today will enable business owners to cater to efficiency and competitiveness, especially with the endless possibilities that conversational AI offers — from dynamic noise suppression software to conversational kiosks that can greet a returning client by name.”

Dr Rishi Bhatnagar, President, Aeris Communications said “We have launched the much-demanded noise cancellation and speech enhancement Enterprise Voice Solution — ClaerityAI to help enterprises increase productivity and enhance customer experience manifold.”

The programme featured sessions where industry leaders and technology experts, including Alok Kumar, Senior Advocate at Supreme Court of India; Shaleja Mahajan, Sr CATI Manager, TeamCVoter; Nilay Malhotra, Founder & CEO, Janani.Life; Shashank Padhye, Founder & CEO at Balcal Nutrefy Diet Solutions; Rahul Singh, Chairperson- PGPX & Professor BIMTECH; Dr SP Aggarwal, Principal, Ramanujan College, DU; CA Himanshu Kumar, Founder, Tax4wealth; Ganesh Shankar, Founder & CEO, FluxGen Technologies; Charanya V Kumar, Co-Founder and Business Head - Gurucool Fun and Digvijay Chaudhari, CEO & MD, Sobus Insight Forum shared their user experience.
