

Indraprastha Apollo Hospitals, Datri launches revamped, BMT centre

19 September 2021 | News

A survivor's meet with the donor's was hosted

On the occasion of World Marrow Donors' Day, Indraprastha Apollo Hospitals in association with Datri has launched an upgraded Centre for Bone Marrow Transplant (BMT) and Cellular Therapy in its premises.

The BMT follow up OPD has been set up close to the centre for being able to prevent these immunocompromised patients from mixing with other patients and reducing their risk of catching secondary infections. To commemorate the Marrow Donors' Day further, Apollo in association with Datri hosted a survivor's meet with their donor's.
