- Have in-built StanFleet software that helps to integrate ambulances across network
- Forayed into emergency and medical response with RedAssist

- Launched air ambulance operations to focus on creating transparency and reducing costs for the common people
- Will focus on creating a talent pool of well-trained professionals

Founder Speaks-

"COVID-19 has highlighted the gaps and challenges in the patient logistics sector. New players have emerged, and the government has extended support by reducing taxes levied while purchasing an ambulance. There is a lot of scope for growth and improvement. We'll see standardization, increase in awareness, implementation of existing regulatory codes, the establishment of new laws and the development of technology."

- Prabhdeep Singh, Chief Executive Officer, StanPlus, Hyderabad
