ICPA hosts online series on clinical challenges faced by dentists

09 November 2021 | News

The series aims to help dentists gain insights from leading authorities in the field

ICPA Health Products (ICPA) recently initiated an interactive online series titled 'ICPA Clinical Series' for addressing specific clinical challenges faced by dentists in everyday practice. Themed ‘Each Episode-One Clinical Challenge’, the series was moderated by ICPA's Technical Head of Marketing Dr Rajeev Chitguppi.

With a set schedule of two episodes per month, the series aims to help dentists gain insights from leading authorities in the field. The webinar sessions are live-streamed across various social media platforms, including YouTube, Facebook and LinkedIn.

The guest speaker Dr Roheet Khatavkar, addressed the newer and unconventional access cavity preparations for root canal treatments.

"Each episode is unique since it addresses one specific clinical challenge and has one guest speaker who is an expert in a specific domain within dentistry. The experts address a pre-decided clinical challenge based on their clinical experience and attempt to provide easy to implement solutions," says Dr Rajeev Chitguppi, Technical Head – Marketing, ICPA.

Before the latest episode on access cavity preparations for root canal treatments, ICPA has held four other sessions. In the inaugural show, Dr Komal Majumdar, a renowned implantologist, addressed issues related to implant prosthodontics.

In the next episode, Dr Aslam Inamdar spoke on overcoming the challenges faced by dentists incorporating digital dentistry in their practice. Dr Moez Khakiani addressed the third session and spoke on clinical solutions to jaw joint problems. Dr Surabhi Mahidhar held the fourth session on the challenges related to screw-retained implant restorations.
