

#startupoftheday 57- HealthCube

23 November 2021 | Features

Transforming healthcare delivery and making diagnosis accessible

Inception- 2015

Location- New Delhi & Bengaluru

Domain- Point-of-care diagnostic devices | Healthtech

Founders- Dr Ramanan Laxminarayan (Founder), Runam Mehta (Chief Executive Officer), Dr Radha Rangarajan (Chief Technology Officer)

Total team strength- 40+

Total funds raised- Rs 37.2 crore

Investors- Alkemi Ventures, Perot-Jain Ventures, Acumen, and SV Latam Capital

Revenue generated since inception- NA

Key Highlights-

- Designs and manufactures point-of-care diagnostic devices to enhance the quality of primary care in diverse settings
- Its multiparametric technology can test for over 30 parameters including blood glucose, hemoglobin, blood pressure, detect infectious diseases markers, and even perform ECGs
- Easy-to-use and portable devices are medical grade, clinically validated, and digitally enabled, with results available instantly.
- An ISO 13485 certified company which has received certification from Central Drugs Standard Control Organization (CDSCO) and European CE.
- Named as the 'Startup of The Year' at the Smart Bio Awards during the Bengaluru Tech Summit 2021
- Received the SKOCH order of merit in 2021
- As of date, over one million beneficiaries have been registered on HealthCube Ecosystem and 2.5 million tests have been performed

Founders Speak-

"We are not standalone wellness, or diagnostics or telemedicine company but a combination of everything. With our device, people can get a multitude of other tests done including ECG. This is currently the only device that offers this holistic solution but at an affordable price. By providing rapid and accurate results HealthCube is enabling positive patient-centric interventions to protect the health, save time, and reduce the cost of healthcare. This is particularly important for countries such as India and DR Congo among others."

- Dr Ramanan Laxminarayan, Founder, HealthCube, US

"As the demand for healthcare expands, it is clear that healthtech will play a central role in filling gaps in access. Innovative products, such as devices by HealthCube, hold the answer to reducing the global burden of chronic conditions through timely testing, monitoring and tracking. Our modular solutions can be deployed in a variety of clinical and non-clinical settings including remote areas, rural community centers and mobile clinics. We look forward to expanding HealthCube's footprint across the country and internationally."

- Runam Mehta, Chief Executive Officer, HealthCube, Bengaluru
