Founder Speaks-

"Indian healthtech space is all set for exponential growth in the coming years. Telemedicine, e-pharmacy, fitness, wellness, healthcare IT, analytics, home healthcare, and personal health management are the key segments witnessing a quantum jump in recent years. The pandemic has further accelerated the pace of adoption. A report by RBSA Advisors projects that the Indian healthtech industry will grow to \$5 billion by 2023 and to \$50 billion by 2033. Cognota Healthcare with its futuristic IT solutions is confident of cashing in those emerging opportunities."

- Sanjeev Dahiwadkar, Founder, Cognota Healthcare, Mumbai
