

Health Minister launches e-clinic for first time in Bihar

20 December 2021 | News

There will be multiple e-clinics in each district at affiliated pharmacy shops

Bihar Health Minister Mangal Pandey has launched ZiffyHealth's E-Clinic to improve health services in the state. As per the startup's plan, they will be initially having 100 E-clinics.

Following that, its number will be gradually increased over the next 18 months. With the help of E-clinics, one crore citizen's electronic health records will be collected over the next year (Health Kiosks). ZiffyHealth has introduced this cutting-edge technology and innovations to Bihar.

"This organisation has set a goal of creating Electronic Health Records (EHR) for people. I was surprised to learn that doctors, thousands of kilometres away would be able to hear and see in real time the heartbeat, blood pressure, sugar level, and oxygen level of patients living in Bihar districts. People will no longer need to travel to major cities for medical treatment as a result of this", said the Minister.

ZiffyTech is a Big Data-Hadoop-based disruptive force healthcare startup that has been incubated and is being accelerated at Atal Innovation Mission-Pinnacle (an offshoot of NITI Ayog).
