- Tested on all other deadly virus breakouts in the world like H1N1 (Swine Flu), H5N1 (Bird flu), Norwalk flu, SARS-COV-1
- Launched REME LED- portable air purifier
- To spread wings in the international market

Founder Speaks-

"India is home to 22 of the world's 30 most polluted cities. The AQI level in some northern Indian cities is among the worst. Air pollution has become a chronic issue, and a long-term solution appears to be a long way off. To combat the threat of rising air pollution, government and non-governmental organizations have devised novel solutions such as switching to cleaner and

greener technologies. The use of room air purifiers has grown in popularity in recent years due to their effectiveness."

- Kartik Singhal, Founder- O2 Cure and Director- Zeco Aircon, Gurugram
